Hello! My name is Sukyi

I am a very lucky puppy as I am being looked after by **San Animal** in a lovely home with 5 other dogs, who are teaching me about being grown up and helping me to recover from my ordeal. (I'm only 8 months old.)

I was all alone wandering (rather awkwardly) along the streets and I was very hungry. One day a Proteccion Civil man stopped to pick me up and took care of me for a night before taking me to the house where I am staying now. I had a lot of difficulty to walk and my hips were not right. I could not walk far or play with the other dogs, even though I had so much bounce and energy hidden within me.

So I was taken to an amazing Vet, who told me I had hip dysplasia and **needed major surgery urgently** to have a chance of walking normally and without pain. My big operation was a triple osteotomy, which took 5 hours. **The Vet had to break 3 bones in my leg and pelvis and put me back together with bolts and pins.** I have to stay in a cage for another 3 weeks, but already I have more movement. **The hip is in a much better position and I can FEEL the difference.** Now that I am bionic(!), I can walk a lot better and I just want to run and run (but I am not allowed to yet). One of the dogs I live with plays with me very gently as I still have a plastic hat on, so she plays tug of war with me laying down, with her head inside my plastic hat as well.

I am SO lucky, as San Animal have been so good to me and helped me to have a normal doggy life. I love everyone who helps me, BUT I feel guilty too as San Animal relies on donations from the public and my surgery cost hundreds of Euros, so now there is very little left for others. There are so many just like I was, with no home and nobody to love them. **PLEASE can you help?**
